

**Industrial Filtration Americas**  
Pioneers in Global Textile Filter Media

**Micro Density™**  
Microdenier Filter Media

**Micro Density™** is the latest addition to the Southern Felt line of high efficiency filter media. Made with a true microdenier fiber blend and **Fiberlox®** technology, **Micro Density™** felts offer yet another option when efficiency and cost matter. Substandard imports and cheap imitations often contain coarser fibers that will not provide the same level of filtration performance. **Micro Density™** is available only from Southern Felt, your trusted source of needlefelt for over 25 years.

### The Micro Density™ Advantage

- True Microdenier Blend
- Utilizes Proprietary **Fiberlox®** Technology
- High Throughput, Low Pressure Drop
- Available in Polyester, Acrylic, Aramid, PPS, and Polyimide
